All indicators have a +/- 1-day window in which their energy should be seen.

* Static is an atmospheric condition when human mental processing is more difficult.

1. Three high volatility days in one week. You would expect some big moves, and we certainly saw that.
2. The Mercury Speed indicator told us that Monday and/or Tuesday would close lower. Monday closed down -0.99%.
3. The Bearish Venus/Uranus aspect on Wednesday would have had us looking for a lower Close on Tuesday and/or Wednesday, but the Bullish/Bearish count and the Bullish Lunar Declination over rode the Bearish influence.
4. The Bullish Lunar Declination becomes Bearish the day after, so we would expect a Close lower.
