1. A Bearish indicator that becomes Bullish the day after it is gone.

2. A Bullish indicator that tells us to watch for a higher close in stocks on Mon, Tue and or Wed.

Using these two bits of information, we could say with confidence, stocks would close high on Monday.

All indicators have a +/- 1-day window in which their energy should be seen.

* Static is an atmospheric condition when human mental processing is more difficult.

TLT		0.41%	-0.02%	-0.45%	-0.24%	0.35%	0.06%

The 10th to the 14th is a Bullish period. With no other indicators showing a Bearish influence, you could say with confidence that stocks would move higher during this period. Note: the 14th is the pivot date. You never know if it will be the top or the first day of a reversal down.

All indicators have a +/- 1-day window in which their energy should be seen.
 * Static is an atmospheric condition when human mental processing is more difficult.
