

The best Market Timers of 2013

Schogt Market Timing -- www.markettiming.nl

The year 2013 was one of the best ever for stock markets of the world. In 2013, global equity markets reached peak after peak. Starting from the seven best buying opportunities of the year, the Dow Jones Industrial Average rallied *more than 6 percent* each time to the next top. Those were enjoyable rides for traders and investors! Those seven tops were followed by corrections of 2-3+ percent until the next buying opportunity was reached. All in all, 2013 contained 16 excellent trading opportunities.

Of course, information like this is most advantageous to anyone when it is known *beforehand*. To achieve this, with the reversal dates that are being brought out by Financial Astrologers traders can define where reversals are most likely to occur.

It is as simple as that. Traders can use this market timing information alongside their favorite technical studies to not just know *where* (in which price area), but also *when* a trend change is most likely. When entering a time band defined by a tight orb that allows up to three days to be qualified as a “turn dates,” the chances of a trade being profitable are greater. Market-timers specialize in this analysis, providing this needed and hard-to-find advantage for traders. Knowing *when* to trade can make a huge positive difference for traders.

Market Timing Digest analyzes the subscription reports of 12 well-known Financial Astrologers, each month. At the end of the year, MTD announces those who made the most consistently correct calls, via the criteria set forth here. MTD is proud to present its list of “Best Market Timers for 2013.”

The best Market Timers of 2013
